▼ Hypertext Transfer Protocol

▶ HTTP/1.1 200 OK\r\n

Date: Tue, 23 Sep 2003 05:29:50 GMT\r\n

Server: Apache/2.0.40 (Red Hat Linux)\r\n

Last-Modified: Tue, 23 Sep 2003 05:29:00 GMT\r\n

ETag: "1bfed-49-79d5bf00"\r\n

Accept-Ranges: bytes\r\n

Content-Length: 73\r\n

Keep-Alive: timeout=10, max=100\r\n

Connection: Keep-Alive\r\n

Content-Type: text/html; charset=ISO-8859-1\r\n

1. *What is the status code and phrase returned from the server to the client browser?*

Status Code: 200

Status Phrase: OK

2.1 *When was the HTML file that the browser is retrieving last modified at the server?*

Tue, 23 Sep 2003, 5:29:00 GMT

2.2 *Does the response also contain a DATE header?*

Yes. It's Tue, 23 Sep 2003, 5:29:50 GMT

2.3 *How are these two fields different?*

The **Date** header is the time when the server sent the response message. The **Last-Modified** header is the time when the server believes the resource requested was last changed.

3.1 *Is the connection established between the browser and the server persistent or non-persistent?*

Persistent.

3.2 *How can you infer this?*

HTTP1.1 is being used, which introduced persistent connection capabilities. Furthermore, the presence of the header field **Connection: Keep-Alive** in the HTTP request/response indicates that a single TCP connection can be used for multiple requests/responses.

4.1 *How many bytes of content are being returned to the browser?*

73

- Line-based text data: text/html (3 lines)

A html file containing:

2. Wireshark HTTP Conditional GET Request/Response

sponse to this second HTTP GET?

Status Code: 304

Status Phrase: Not Modified

4.2 Did the server explicitly return the contents of the file? Explain.

No. The webserver determined that the file requested was already present in the client's browser cache and therefore did not need to return the file contents.

5.1 What is the value of the Etag field in the 2nd response message and how it is used?

ETag: "1bfef-173-8f4ae900". It's used to determine if the content of a requested resource has changed on the server side and needs to be sent back to the client. Furthermore, it's used in conjunction with the timestamp given by If-Modified-Since to implement conditional GET requests.

5.2 Has this value changed since the 1st response message was received?

No
